No person has been authorized to give any information or to make any representations other than those contained in this Prospectus and the Fund's Statement of Additional Information (the "SAI") dated June 1, 2017 (which is incorporated by reference into this Prospectus and is legally a part of this Prospectus) and, if given or made, such information or representations may not be relied upon as having been authorized by us.

FUND SUMMARY

Investment Objective Arrow QVM Equity Factor ETF (the “Fund”) seeks to replicate investment results that generally correspond, before fees and expenses, to the price and yield performance of AI Quality Value Momentum Index.

Fees and Expenses The table below describes the fees and expenses that you may pay if you buy and hold shares of the Fund (“Shares”). Investors may pay brokerage commissions on their purchases and sales of Shares in the secondary market, which are not reflected in the table or the example below.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.60%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses	1.42%
Total Annual Fund Operating Expenses	2.02%
Fee Waiver ⁽¹⁾	(1.37)%
Total Annual Fund Operating Expenses After Fee Waiver	0.65%

(1) The advisor has contractually agreed to waive its fees and/or reimburse expenses of the Fund until May 31, 2018 to ensure that the Fund's Total Annual Fund Operating Expenses After Fee Waiver and/or Reimbursement (exclusive of any front-end or contingent deferred sales loads, taxes, leverage interest, brokerage commissions, expenses incurred in connection with any merger or reorganization, dividend expense on securities sold short, underlying fund fees and expenses and extraordinary expenses such as litigation) will not exceed 0.65%. These fee waivers and expense reimbursements are subject to possible recoupment from the Fund in future years on a rolling three-year basis (within the three years after the fees have been waived or reimbursed) if such recoupment can be achieved within the foregoing expense limits. This agreement may be terminated by the Fund's Board of Trustees on 60 days' written notice.

Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

This example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. This example does not reflect the brokerage commissions that you may pay to buy and sell Shares. Although your actual costs may be higher or lower, your costs, based on these assumptions, would be:

1 YEAR	3 YEARS	5 YEARS	10 YEARS
\$66	\$501	\$961	\$2,238

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it purchases and sells securities (or “turns over” its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the example, may affect the Fund's performance. During the fiscal year ended January 31, 2017, the Fund's portfolio turnover rate was 114% of the average value of its portfolio.

Principal Investment Strategies

The Fund generally will invest at least 80% of its total assets in common stocks that comprise the AI Quality Value Momentum Index (the “Index”). Arrow Insights (“index provider”), selects common stocks pursuant to a proprietary selection methodology that is designed to identify Tri-Factor™ 50, the leaders with the strongest fundamental performance characteristics. To qualify for the universe of Tri-Factor™ 50, an issuer must be highly ranked by the selection methodology among the following factors: profitability, consistency of earnings, dividend yield, price to earnings, management confidence, and long term performance. The Index is equally weighted, reconstituted in January and July, and rebalanced quarterly.

The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Index concentrates in an industry or group of industries. These industries are expected to include, but not be limited to, financial, utilities and consumer goods.

Principal Investment Risks

The following summarizes the principal investment risks of the Fund.

The Shares will change in value, and you could lose money by investing in the Fund. The Fund may not achieve its investment objective and an investment in the Fund is not by itself a complete or balanced investment program. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Asset Class Risk. Securities in the Index or in the Fund's portfolio may underperform in comparison to the general securities markets or other asset classes.

Concentration Risk. The Fund may focus its investments in securities of a particular industry to the extent the Index does. Economic, legislative or regulatory developments may occur that significantly affect the industry. This may cause the Fund's net asset value to fluctuate more than that of a fund that does not focus in a particular industry.

Early Close/Trading Halt Risk. An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may prevent the Fund from buying or selling certain securities or financial instruments. In these circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and may incur substantial trading losses.

ETF Structure Risks. The Fund is structured as an exchange traded fund ("ETF") and as a result is subject to the special risks, including:

Not Individually Redeemable. Shares are not individually redeemable and may be redeemed by the Fund at NAV only in large blocks known as "Creation Units." You may incur brokerage costs purchasing enough Shares to constitute a Creation Unit.

Trading Issues. Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility. There can be no assurance that Shares will continue to meet the listing requirements of the Exchange. An active trading market for the Fund's shares may not be developed or maintained. If the securities in the Fund's portfolio are traded outside a collateralized settlement system, the number of financial institutions that can act as authorized participants that can post collateral on an agency basis is limited, which may limit the market for the Fund's shares.

Market Price Variance Risk. The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares and will include a "bid-ask spread" charged by the exchange specialists, market makers or other participants that trade the particular security. There may be times when the market price and the NAV vary significantly. This means that Shares may trade at a discount to NAV.

- In times of market stress, market makers may step away from their role of market making in shares of ETFs and in executing trades, which can lead to differences between the market value of Fund shares and the Fund's net asset value.
- The market price for the Fund's shares may deviate from the Fund's net asset value, particularly during times of market stress, with the result that investors may pay significantly more or significantly less for Fund shares than the Fund's net asset value, which is reflected in the bid and ask price for Fund shares or in the closing price.
- When all or a portion of an ETF's underlying securities trade in a market that is closed when the market for the Fund's shares is open, there may be changes from the last quote of the closed market and the quote from the Fund's domestic trading day, which could lead to differences between the market value of the Fund's shares and the Fund's net asset value.
- In stressed market conditions, the market for the Fund's shares may become less liquid in response to the deteriorating liquidity of the Fund's portfolio. This adverse effect on the liquidity of the Fund's shares may, in turn, lead to differences between the market value of the Fund's shares and the Fund's net asset value.

Index Risk. Unlike many investment companies, the Fund does not utilize an investing strategy that seeks returns in excess of the Index. Therefore, it would not necessarily sell a security unless that security is removed from the Index, even if that security generally is underperforming.

Management Risk. As the Fund may not fully replicate the Index, it is subject to the risk that investment management strategy may not produce the intended results.

Non-Correlation Risk. The Fund's return may not match the return of the Index for a number of reasons, including: the Fund incurs operating expenses not applicable to the Index, and incurs costs in buying and selling securities; the Fund may not be fully invested at times; the performance of the Fund and the Index may vary due to asset valuation differences and differences between the Fund's portfolio and the Index resulting from legal restrictions, cost or liquidity constraints and; if used, representative sampling may cause the Fund's tracking error to be higher than would be the case if the Fund purchased all of the securities in the Index.

Passive Investment Risk. The Fund is not actively managed and the Advisor will not sell shares of an equity security due to current or projected underperformance of a security, industry or sector, unless that security is removed from the Index or the selling of shares of that security is otherwise required upon a rebalancing of the Index as addressed in the Index methodology.

Portfolio Turnover Risk. Portfolio turnover refers to the rate at which the securities held by the Fund are replaced. The higher the rate, the higher the transactional and brokerage costs associated with the turnover, which may reduce the Fund’s return unless the securities traded can be bought and sold without corresponding commission costs. Active trading of securities may also increase a Fund’s realized capital gains or losses, which may affect the taxes you pay as a Fund shareholder.

Sampling Risk. The Fund’s use of a representative sampling approach, if used, could result in its holding a smaller number of securities than are in the Index. As a result, an adverse development with an issuer of securities held by the Fund could result in a greater decline in NAV than would be the case if the Fund held all of the securities in the Index. To the extent the assets in the Fund are smaller, these risks will be greater.

Small and Medium Capitalization Stock Risk. The earnings and prospects of small and medium sized companies are more volatile than larger companies and may experience higher failure rates than larger companies. Small and medium sized companies normally have a lower trading volume than larger companies, which may tend to make their market price fall more disproportionately than larger companies in response to selling pressures and may have limited markets, product lines, or financial resources and lack management experience.

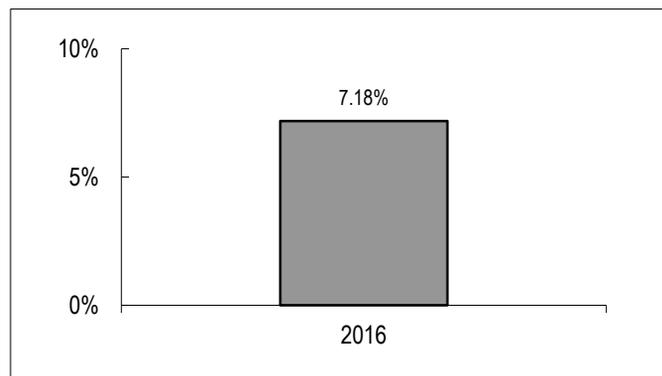

Stock Market Risk. Overall stock market risks may affect the value of the Fund. Factors such as domestic economic growth and market conditions, interest rate levels and political events affect the securities markets.

Tracking Error Risk. Tracking error is the divergence of the Fund’s performance from that of the Index. Tracking error may occur because of imperfect correlation between the Fund’s holdings of portfolio securities and those in the Index, pricing differences, the Fund’s holding of cash, differences on timing of the accrual of dividends, changes to the Index or the need to meet various regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the Fund incurs fees and expenses, while the Index does not.

Performance

The bar chart and performance table below show the variability of the Fund’s returns, which is some indication of the risks of investing in the Fund. The bar chart shows performance of the Fund’s shares for each full calendar year since the Fund’s inception. The performance table compares the performance of the Fund’s shares over time to the performance of a broad-based market index. You should be aware that the Fund’s past performance (before and after taxes) may not be an indication of how the Fund will perform in the future. Updated performance information is available at no cost by visiting www.arrowshares.com or by calling 1-877-277-6933 (1-877-ARROW-FD).

Annual Total Return (Year ended December 31):

Best Quarter	12/31/2016	5.74%
Worst Quarter	6/30/2016	(2.25)%

The year-to-date return as of the most recent calendar quarter, which ended March 31, 2017 was 3.72%.

Average Annual Total Returns (as of December 31, 2016)

	One Year	Since Inception*
Return Before Taxes	7.18%	(0.19)%
Return after Taxes on Distributions	6.19%	(0.85)%
Return after Taxes on Distributions and Sale of Fund Shares	4.64%	(0.22)%
AI Quality Value Momentum Index	7.25%	(0.16)%
S&P 500 [®] Index (reflects no deduction for fees, expenses or taxes)	11.96%	5.66%

* February 27, 2015

Management

Investment Advisor. Arrow Investment Advisors, LLC (the “Advisor”).

Portfolio Managers. The following individuals are primarily responsible for the day-to-day management of the Fund’s portfolio:

Name	Title with Advisor	When Began Managing Fund
William E. Flaig Jr.	Chief Investment Officer	2015
Joseph Barrato	CEO	2015
Jon Guyer	Portfolio Manager	2015

Purchase and Sale of Fund Shares

The Fund will issue and redeem Shares at NAV only in large blocks of 50,000 Shares (each block of Shares is called a “Creation Unit”). Creation Units are issued and redeemed for cash and/or in-kind for securities. Individual Shares may only be purchased and sold in secondary market transactions through brokers. Except when aggregated in Creation Units, the Shares are not redeemable securities of the Fund.

Shares of the Fund are listed for trading on NYSE Arca, Inc. (the “Exchange”) and trade at market prices rather than NAV. Shares of the Fund may trade at a price that is greater than, at, or less than NAV.

Tax Information

The Fund’s distributions generally will be taxable as ordinary income or long-term capital gains. A sale of Shares may result in capital gain or loss.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

ADDITIONAL INFORMATION ABOUT THE PRINCIPAL INVESTMENT STRATEGIES AND RISKS

Principal Investment Strategies

Arrow Insights, a division of the Fund's investment advisor, Arrow Investment Advisors, LLC, selects common stocks for the Index pursuant to a proprietary selection methodology that is designed to identify Tri-Factor™ 50, the leaders with the strongest fundamental performance characteristics.

The Index was created in 2014. In selecting securities for the Index, the model considers quality, value and momentum factors. Quality factors include earning per share variability, return on equity, and return of earnings to shareholders in the form of dividends or share buybacks. The value factor provides the ability to capture the price appreciation potential of stocks that are priced relatively lower than average based on financial metrics. The price momentum factors also allow the Index to limit the selection of value stocks to those that have already had some market confirmation based on price performance using a longer term price momentum factor, which corresponds to longer term expected future performance.

The index provider selects common stocks pursuant to a proprietary selection methodology that is designed to identify Tri-Factor™ 50. From a universe of approximately 3,500 common stocks traded on U.S. exchanges that meet minimum liquidity (three month average daily dollar volume above \$1 million) and price standards (minimum price of \$5 per share). Securities are rank based on quality, value and momentum variables. Securities must be highly ranked among the following factors:

- Profitability on shareholder's equity
- Consistency of historical earnings
- Dividend yield paid to shareholders
- Share buyback, reducing actual shares outstanding
- Valuation, or is the price of the company reasonably valued
- Long term price performance, or has the company been recognized historically

The securities ranked by each factor are then summed to get the 50 highest ranked securities in the universe ("Tri-Factor™ 50"). The top 50 ranked companies as of December and June of each calendar year are checked for news or corporate actions that may change the rankings and then implemented in the next subsequent month, January and July, respectively. The portfolio is equally weighted and rebalanced quarterly at the end of January, April, July, and October of each calendar year. The composition of the Fund's portfolio therefore will change to the extent necessary to replicate the Index.

Under normal market conditions the Fund will invest at least 80% of its assets (defined as net assets plus any borrowing for investment purposes) in securities that comprise the Index. The Fund uses an "indexing" investment approach to seek investment results that generally correspond, before fees and expenses to the performance of the Index. The Adviser seeks correlation over time of 0.95 or better between the Fund's performance and the performance of the Index; a figure of 1.00 would represent perfect correlation.

The Fund generally invests in all of the securities comprising the Index in proportion to the weightings of the securities in the Index. However, under various circumstances, it may not be possible or practicable to purchase all of those securities in those same weightings. In those circumstances, a Fund may purchase a sample of securities in the Index. There also may be instances in which the Adviser may choose to (i) overweight a security in the Index, (ii) purchase securities not contained the Index that the Adviser believes are appropriate to substitute for certain securities in the Index, or (iii) utilize various combinations of other available investment techniques in seeking to track the Index. The Fund may sell securities included in the Index in anticipation of their removal from the Index, or purchase securities not included in the Index in anticipation of their addition to the Index.

Although the Adviser intends for the Fund to replicate the Index, the Fund may employ representative sampling to achieve its investment objective. In particular, the Fund may use representative sampling when securities in the Index are not available in the quantities needed by the Fund, when any security in the Index is subjecting to trading in round lots that are too large for inclusion in the basket of in-kind securities deposited for a Creation Unit, and until the Fund achieves scale.

The Fund may invest up to 20% of its assets in instruments that are not component securities of the Index, if the Adviser believes that such instruments will help the Fund to track its Index. For example, provided that the Fund continues to invest at least 80% of its total assets in the components of the Index and the Adviser believes it will help the Fund to track its Index, the Fund may invest in securities not included in the Index, such as other ETFs, and money market instruments, including repurchase agreements or other funds that invest exclusively in money market instruments (subject to applicable limitations under the Investment Company Act of 1940, as amended, (the "1940 Act"), or rules under the 1940 Act). Further, the Fund may sell securities included in its Index in anticipation of their removal from the Index, purchase securities not included in the Index in anticipation of their addition to the Index and/or hold a security no longer included in the Index. The Adviser anticipates that it may take approximately three business days (a business day is any day that the New York Stock Exchange ("NYSE") is open) for the Adviser to reflect fully the additions and deletions to the Index in the portfolio composition of the Fund.

The AI Quality Value Momentum Index is calculated and maintained by Solactive AG on behalf of the index provider.

Principal Investment Risks

The following provides additional information about certain of the principal risks identified under “Principal Investment Risks” and other risks applicable to the Fund.

Concentration Risk. Sector risk is the possibility that securities within the same group of industries will decline in price due to sector-specific market or economic developments. If the Fund invests more heavily in a particular industry, the value of its shares may be especially sensitive to factors and economic risks that specifically affect that industry. As a result, the Fund’s share price may fluctuate more widely than the value of shares of a mutual fund that invests in a broader range of industries. Additionally, some industries could be subject to greater government regulation than other sectors. Therefore, changes in regulatory policies for those industries may have a material effect on the value of securities issued by companies in those industries. The industries in which the Fund may invest, directly or indirectly, will vary based on the investments of the Index.

ETF Structure Risks. The Fund is structured as an ETF and as a result is subject to the special risks, including:

Not Individually Redeemable. Shares are not individually redeemable and may be redeemed by the Fund at NAV only in large blocks known as “Creation Units.” You may incur brokerage costs purchasing enough Shares to constitute a Creation Unit.

Trading Issues. Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility. There can be no assurance that Shares will continue to meet the listing requirements of the Exchange. There can be no assurance that Shares will continue to meet the listing requirements of the Exchange. An active trading market for the Fund’s shares may not be developed or maintained. If the securities in the Fund’s portfolio are traded outside a collateralized settlement system, the number of financial institutions that can act as authorized participants that can post collateral on an agency basis is limited, which may limit the market for the Fund’s shares.

Market Price Variance Risk. Individual Shares of the Fund that are listed for trading on the Exchange can be bought and sold in the secondary market at market prices. The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares. There may be times when the market price and the NAV vary significantly and you may pay more than NAV when buying Shares on the secondary market, and you may receive less than NAV when you sell those Shares. The market price of Shares, like the price of any exchange-traded security, includes a “bid-ask spread” charged by the exchange specialists, market makers or other participants that trade the particular security. In times of severe market disruption, the bid-ask spread often increases significantly. This means that Shares may trade at a discount to NAV and the discount is likely to be greatest when the price of Shares is falling fastest, which may be the time that you most want to sell your Shares. The Fund’s investment results are measured based upon the daily NAV of the Fund over a period of time. Investors purchasing and selling Shares in the secondary market may not experience investment results consistent with those experienced by those creating and redeeming directly with the Fund.

- In times of market stress, market makers may step away from their role of market making in shares of ETFs and in executing trades, which can lead to differences between the market value of Fund shares and the Fund’s net asset value.
- The market price for the Fund’s shares may deviate from the Fund’s net asset value, particularly during times of market stress, with the result that investors may pay significantly more or significantly less for Fund shares than the Fund’s net asset value, which is reflected in the bid and ask price for Fund shares or in the closing price.
- When all or a portion of an ETF’s underlying securities trade in a market that is closed when the market for the Fund’s shares is open, there may be changes from the last quote of the closed market and the quote from the Fund’s domestic trading day, which could lead to differences between the market value of the Fund’s shares and the Fund’s net asset value.
- In stressed market conditions, the market for the Fund’s shares may become less liquid in response to the deteriorating liquidity of the Fund’s portfolio. This adverse effect on the liquidity of the Fund’s shares may, in turn, lead to differences between the market value of the Fund’s shares and the Fund’s net asset value.

Index Risk. Unlike many investment companies, the Fund does not utilize an investing strategy that seeks returns in excess of the Index. Therefore, it would not necessarily sell a security unless that security is removed from the Index, even if that security generally is underperforming.

Non-Correlation Risk. The Fund’s return may not match the return of the Index for a number of reasons, including the following:

- The Fund incurs operating expenses not applicable to the Index, and incurs costs in buying and selling securities, especially when rebalancing the Fund’s securities holdings to reflect changes in the composition of the Index.
- The Fund’s use of representative sampling may cause the Fund’s tracking error with respect to the Index to be higher than would be the case if the Fund purchased all of the securities in the Index.

- The performance of the Fund and the Index may vary due to asset valuation differences: the Fund may fair value certain of the securities it holds and to the extent it calculates its NAV based on fair value prices, the Fund's ability to track the Index may be adversely affected.
- There may be differences between the Fund's portfolio and the Index as a result of legal restrictions, cost or liquidity constraints. For example, the Index is not subject to the tax diversification requirements to which the Fund must adhere; so the Fund may be required to deviate its investments from the securities and relative weightings of the Index. Similarly, the Fund may not invest in certain securities included in the Index due to liquidity constraints. Liquidity constraints also may delay the Fund's purchase or sale of securities included in the Index.
- The investment activities of one or more of the Advisor's affiliates for their proprietary accounts and for client accounts may also adversely impact the Fund's ability to track the Index. For example, in regulated industries, and in corporate and regulatory ownership definitions, there may be limits on the aggregate amount of investment by affiliated investors that may not be exceeded, or that may not be exceeded without the grant of a license or other regulatory or corporate consent or, if exceeded, may cause the Advisor, the Fund or other client accounts to suffer disadvantages or business restrictions. As a result, the Fund may be restricted in its ability to acquire particular securities due to positions held by the Advisor's affiliates.

Passive Investment Risk. The Fund is not actively managed and may be affected by a general decline in market segments related to the Index. The Fund invests in securities included in, or representative of securities included in, the Index, regardless of their investment merits. The Fund does not take defensive positions under any market conditions, including conditions that are adverse to the performance of the Fund, unless such defensive positions are also taken by the Index.

Portfolio Turnover Risk. Portfolio turnover refers to the rate at which the securities held by the Fund are replaced. The higher the rate, the higher the transactional and brokerage costs associated with the turnover, which may reduce the Fund's return unless the securities traded can be bought and sold without corresponding commission costs. Active trading of securities may also increase a Fund's realized capital gains or losses, which may affect the taxes you pay as a Fund shareholder.

Sampling Risk. The Fund's use of a representative sampling approach, if used, could result in its holding a smaller number of securities than are in the Index. As a result, an adverse development with an issuer of securities held by the Fund could result in a greater decline in NAV than would be the case if the Fund held all of the securities in the Index. To the extent the assets in the Fund are smaller, these risks will be greater.

Small and Medium Capitalization Stock Risk. The earnings and prospects of small and medium sized companies are more volatile than larger companies and may experience higher failure rates than larger companies. Small and medium sized companies normally have a lower trading volume than larger companies, which may tend to make their market price fall disproportionately more than larger companies in response to selling pressures and may have limited markets, product lines, or financial resources and lack management experience.

Stock Market Risk. The Fund's NAV and investment return will fluctuate based upon changes in the value of its portfolio securities, which could go down in value, sometimes sharply and unpredictably. You could lose money on your investment in the Fund, or the Fund could underperform other investments. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's NAV will fluctuate based upon changes in the value of its portfolio securities. The market value of securities in which the Fund invests is based upon the market's perception of value and is not necessarily an objective measure of the securities' value. There is no assurance that the Fund will achieve its investment objective, and an investment in the Fund is not by itself a complete or balanced investment program. The financial problems in global economies over the past several years, including the European sovereign debt crisis, may continue to cause high volatility in global financial markets. In addition, global economies are increasingly interconnected, which increases the possibilities that conditions in one country or region might adversely impact a different country or region. The severity or duration of these conditions may also be affected if one or more countries leave the euro currency or by other policy changes made by governments or quasi-governmental organizations.

Tracking Error Risk. Tracking error is the divergence of the Fund's performance from that of the Index. Tracking error may occur because of imperfect correlation between the Fund's holdings of portfolio securities and those in the Index, pricing differences, the Fund's holding of cash, differences on timing of the accrual of dividends, changes to the Index or the need to meet various regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the Fund incurs fees and expenses, while the Index does not.

Cybersecurity

The computer systems, networks and devices used by the Fund and its service providers to carry out routine business operations employ a variety of protections designed to prevent damage or interruption from computer viruses, network failures, computer and telecommunication failures, infiltration by unauthorized persons and security breaches. Despite the various protections utilized by the Fund and its service providers, systems, networks, or devices potentially can be breached. The Fund and its shareholders could be negatively impacted as a result of a cybersecurity breach.

Cybersecurity breaches can include unauthorized access to systems, networks, or devices; infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. Cybersecurity breaches may cause disruptions and impact the Fund's business operations, potentially resulting in financial losses; interference with the Fund's ability to calculate their NAV; impediments to trading; the inability of the Fund, the Advisor, and other service providers to transact business; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs; as well as the inadvertent release of confidential information.

Similar adverse consequences could result from cybersecurity breaches affecting issuers of securities in which the Fund invests; counterparties with which the Fund engages in transactions; governmental and other regulatory authorities; exchange and other financial market operators, banks, brokers, dealers, insurance companies, and other financial institutions (including financial intermediaries and service providers for the Fund's shareholders); and other parties. In addition, substantial costs may be incurred by these entities in order to prevent any cybersecurity breaches in the future.

MANAGEMENT OF THE FUND

Investment Advisor

Arrow Investment Advisors, LLC, located at 6100 Chevy Chase Drive, Suite 100, Laurel, MD 20707, serves as the Fund's investment advisor. Subject to the authority of the Board of Trustees, the Advisor is responsible for the overall management of the Fund's business affairs. The Advisor is responsible for selecting the Fund's investments according to the Fund's investment objective, policies and restrictions. The Advisor was established in February 2006.

Pursuant to the Investment Advisory Agreement, the advisor is entitled to receive, on a monthly basis, an annual advisory fee equivalent to 0.60% of the Fund's average daily net assets. The advisor has contractually agreed to waive its fees and/or reimburse expenses of the Fund until May 31, 2018 to ensure that the Fund's Total Annual Fund Operating Expenses After Fee Waiver and/or Reimbursement (exclusive of any front-end or contingent deferred sales loads, taxes, leverage interest, brokerage commissions, expenses incurred in connection with any merger or reorganization, dividend expense on securities sold short, underlying fund fees and expenses and extraordinary expenses such as litigation) will not exceed 0.65%. This fee waiver and expense reimbursement are subject to possible recoupment from the Fund in future years on a rolling three-year basis (within the three years after the fees have been waived or reimbursed) if such recoupment can be achieved within the foregoing expense limits. This agreement may be terminated by the Fund's Board of Trustees on 60 days written notice. For the fiscal year ended January 31, 2017, the Fund paid the Advisor 0% of the Fund's average net assets after waivers and reimbursements.

In addition to investment advisory fees, the Fund pays other expenses including costs incurred in connection with the maintenance of its securities law registration, printing and mailing prospectuses and Statements of Additional Information to shareholders, certain financial accounting services, taxes or governmental fees, custodial, transfer and shareholder servicing agent costs, expenses of outside counsel and independent accountants, preparation of shareholder reports and expenses of trustee and shareholders meetings.

A discussion regarding the Board's basis for approving the Investment Advisory Agreement with respect to the Fund is available in the annual report to shareholders for the period ended January 31, 2017.

Portfolio Managers

The following individuals are primarily responsible for the day-to-day management of the Fund's portfolio:

William E. Flaig Jr., *Chief Investment Officer*

William E. Flaig, Jr. has been responsible for the day to day management of the Fund since its inception in 2015. Mr. Flaig joined Arrow Investment Advisors in February of 2007. From 2005 to 2007 he was a principal of Paladin Asset Management, where Mr. Flaig refined original research in absolute return factors which evolved into Paladin's corresponding alternative investment strategies. From 2000 to 2005, Mr. Flaig served Rydex Investments in portfolio management roles of increasing responsibility, culminating with his appointment as Director of Portfolio Management/Director of Investment Strategy with responsibility for all Rydex Portfolio Managers. Mr. Flaig graduated from Purdue University with a degree in Management.

Joseph Barrato *Portfolio Manager*

Joseph Barrato is a founding member of Arrow Investment Advisors, LLC. He has over 20 years of experience in the investment management industry, including six years with Rydex Investments, where he was responsible for the firm's research and developed momentum models with the Rydex sector funds. Prior to Rydex, Mr. Barrato spent 12 years at the Federal Reserve Board of Governors, as an analyst and senior financial examiner. He holds a bachelor's degree in business administration from The George Washington University, where he majored in finance and minored in accounting. Mr. Barrato's experience in the investment management industry gives him a strong understanding of the operational issues facing mutual funds and the regulatory framework under which investment companies must operate. Mr. Barrato has served as an Interested Trustee and the Chairman of the Board since the Trust was organized in August 2011.

Jonathan S. Guyer *Portfolio Manager*

Jonathan Guyer joined Arrow Investment Advisors, LLC in October 2013 after spending seven years with Longview Funds Management, LLC. During his tenure at Longview, he served the Principal, Director of Research and Chief Investment Officer of the firm. Prior to Longview, Mr. Guyer spent seven years as the head of the Proprietary Hedge Fund Group of Alex Brown & Sons, Inc., followed by five years serving as the head of Alternative Investment Product Development for Legg Mason Wood Walker, Inc. Throughout his investment management career, he has had practical experience working with index design, active portfolio management, trading, manager selection, due diligence, marketing and fund administration.

Prior to his career in investment management, Mr. Guyer spent eight years in the audit industry, serving as a senior audit manager for commercial banks and trust companies. Mr. Guyer earned his bachelor's degree in Business Administration from the University of North Carolina-Wilmington.

The Fund's SAI provides additional information about the portfolio managers' compensation structure, other accounts managed by the portfolio managers and the portfolio managers' ownership of securities in the Fund.

NET ASSET VALUE

Gemini Fund Services, LLC, the Fund's Administrator, calculates the Fund's NAV at the close of regular trading (normally 4:00 p.m., Eastern Time) every day that the NYSE is open. NAV is calculated by deducting all of the Fund's liabilities from the total value of its assets and dividing the result by the number of Shares outstanding, rounding to the nearest cent. All valuations are subject to review by the Trust's Board or its delegate.

In determining NAV, expenses are accrued and applied daily and securities and other assets for which market quotations are readily available are valued at market value. Securities listed or traded on an exchange are generally valued at the last sales price or official closing price of the exchange where the security is primarily traded. The NAV for the Fund is calculated and disseminated daily. The value of the Fund's portfolio securities is based on market value when market quotations are readily available. Money market securities maturing in 60 days or less will be valued at amortized cost. Securities not listed or traded on an exchange for which over-the-counter market quotations are readily available are generally valued at the current bid price. Debt securities are valued on the basis of prices provided by independent pricing services. If a security's market price is not readily available, the security will be valued at fair value as determined by the Trust's Fair Value Committee in accordance with the Trust's valuation policies and procedures approved by the Board. Investment securities and other assets and liabilities denominated in a foreign currency, and income receipts and expense payments are translated into U.S. dollars using the prevailing exchange rate at the London market close. Any use of a different rate from the rates used by each Index Provider may adversely affect the Fund's ability to track its Index.

Even when market quotations are available, they may be stale or unreliable because the security is not traded frequently, trading on the security ceased before the close of the trading market or issuer specific events occurred after the security ceased trading or because of the passage of time between the close of the market on which the security trades and the close of NYSE and when the Fund calculates its NAV. Issuer-specific events may cause the last market quotation to be unreliable. These events may include a merger or insolvency, events which affect a geographical area or an industry segment, such as political events or natural disasters, or market events, such as a significant movement in the U.S. market. Where market quotations are not readily available, including where the Advisor determines that the closing price of the security is unreliable, the Advisor will value the security at fair value in good faith using procedures approved by the Board. Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security is materially different than the value that could be realized upon the sale of the security. In addition, fair value pricing could result in a difference between the prices used to calculate the Fund's NAV and the prices used by the Index. This may adversely affect the Fund's ability to track the Index.

Because foreign markets may be open on different days than the days during which a shareholder may purchase Shares, the value of the Fund's investments may change on days when shareholders are not able to purchase Shares. Additionally, due to varying holiday schedules, redemption requests made on certain dates may result in a settlement period exceeding seven calendar days. A list of the holiday schedules of the foreign exchanges of the Fund's Index, as well as the dates on which a settlement period would exceed seven calendar days in 2016, is contained in an appendix to the SAI.

PREMIUM/DISCOUNT INFORMATION

Most investors buy and sell Shares of the Fund in secondary market transactions through brokers at market prices and the Fund's Shares trade at market prices. The market price of Shares of the Fund may be greater than, equal to, or less than NAV. Market forces of supply and demand, economic conditions and other factors may affect the trading prices of Shares of the Fund.

Information regarding how often the Shares of the Fund traded at a price above (at a premium to) or below (at a discount to) the NAV of the Fund during the past four calendar quarters can be found at www.ArrowShares.com.

HOW TO BUY AND SELL SHARES

Shares of the Fund are listed for trading on NYSE Arca under the symbol QVM. Share prices are reported in dollars and cents per Share. Shares can be bought and sold on the secondary market throughout the trading day like other publicly traded shares, and Shares typically trade in blocks of less than a Creation Unit. There is no minimum investment required. Shares may only be purchased and sold on the secondary market when the Exchange is open for trading. The Exchange is open for trading Monday through Friday and is closed on weekends and the following holidays, as observed: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction.

Authorized participants ("APs") may acquire Shares directly from the Fund, and APs may tender their Shares for redemption directly to the Fund, at NAV per Share only in large blocks, or Creation Units, of 50,000 Shares. Purchases and redemptions directly with the Fund must follow the Fund's procedures, which are described in the SAI.

The Fund may liquidate and terminate at any time without shareholder approval.

Share Trading Prices

The approximate value of Shares of the Fund, an amount representing on a per share basis the sum of the current market price of the securities accepted by the Fund in exchange for Shares of the Fund and an estimated cash component will be disseminated every 15 seconds throughout the trading day through the facilities of the Consolidated Tape Association. This approximate value should not be viewed as a "real-time" update of the NAV per Share of the Fund because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day. The Fund is not involved in, or responsible for, the calculation or dissemination of the approximate value of the Shares and the Fund does not make any warranty as to the accuracy of these values.

Book Entry

Shares are held in book entry form, which means that no stock certificates are issued. The Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding Shares of the Fund and is recognized as the owner of all Shares for all purposes.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book entry or "street name" form.

FREQUENT PURCHASES AND REDEMPTIONS OF SHARES

The Fund's Shares can only be purchased and redeemed directly from the Fund in Creation Units by APs, and the vast majority of trading in the Fund's Shares occurs on the secondary market. Because the secondary market trades do not directly involve the Fund, it is unlikely those trades would cause the harmful effects of market timing, including dilution, disruption of portfolio management, increases in the Fund's trading costs and the realization of capital gains. With regard to the purchase or redemption of Creation Units directly with the Fund, to the extent effected in-kind (*i.e.*, for securities), those trades do not cause the harmful effects that may result from frequent cash trades. To the extent trades are effected in whole or in part in cash, those trades could result in dilution to the Fund and increased transaction costs, which could negatively impact the Fund's ability to achieve its investment objective. However, direct trading by APs is critical to ensuring that the Fund's Shares trade at or close to NAV. The Fund also employs fair valuation pricing to minimize potential dilution from market timing. In addition, the Fund imposes transaction fees on purchases and redemptions of Fund Shares to cover the custodial and other costs incurred by the Fund in effecting trades. These fees increase if an investor substitutes cash in part or in whole for securities, reflecting the fact that the Fund's trading costs increase in those circumstances. Given this structure, the Trust has determined that it is not necessary to adopt policies and procedures to detect and deter market timing of the Fund's Shares.

PORTFOLIO HOLDINGS

A description of the Trust's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's SAI, which is available at www.ArrowShares.com.

DISTRIBUTION AND SERVICE PLAN

The Fund has adopted a distribution and service plan ("Plan") pursuant to Rule 12b-1 under the 1940 Act. Under the Plan, the Fund is authorized to pay distribution fees to the distributor and other firms that provide distribution and shareholder services ("Service Providers"). If a Service Provider provides these services, the Fund may pay fees at an annual rate not to exceed 0.25% of average daily net assets, pursuant to Rule 12b-1 under the 1940 Act.

No distribution or service fees are currently paid by the Fund and there are no current plans to impose these fees. In the event Rule 12b-1 fees were charged, over time they would increase the cost of an investment in the Fund.

DIVIDENDS, OTHER DISTRIBUTIONS AND TAXES

Unlike interests in conventional mutual funds, which typically are bought and sold from and to the fund only at closing NAVs, the Fund's Shares are traded throughout the day in the secondary market on a national securities exchange on an intra-day basis and are created and redeemed in-kind and/or for cash in Creation Units at each day's next calculated NAV. In-kind arrangements are designed to protect ongoing shareholders from the adverse effects on the Fund's portfolio that could arise from frequent cash redemption transactions. In a conventional mutual fund, redemptions can have an adverse tax impact on taxable shareholders if the mutual fund needs to sell portfolio securities to obtain cash to meet net fund redemptions. These sales may generate taxable gains for the ongoing shareholders of the mutual fund, whereas the Shares' in-kind redemption mechanism generally will not lead to a tax event for the Fund or its ongoing shareholders.

Ordinarily, dividends from net investment income, if any, are declared and paid quarterly by the Fund. The Fund distributes its net realized capital gains, if any, to shareholders annually.

Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

Taxes

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences when:

- The Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

Taxes on Distributions

As stated above, dividends from net investment income, if any, ordinarily are declared and paid quarterly by the Fund. The Fund may also pay a special distribution at the end of a calendar year to comply with federal tax requirements. Distributions from the Fund's net investment income, including net short-term capital gains, if any, are taxable to you as ordinary income, except that the Fund's dividends attributable to its "qualified dividend income" (*i.e.*, dividends received on stock of most domestic and certain foreign corporations with respect to which the Fund satisfies certain holding period and other restrictions), if any, generally are subject to federal income tax for non-corporate shareholders who satisfy those restrictions with respect to their Fund shares at the rate for net capital gain -- a maximum of 15% for taxable years beginning before 2014. A part of the Fund's dividends also may be eligible for the dividends-received deduction allowed to corporations -- the eligible portion may not exceed the aggregate dividends the Fund receives from domestic corporations subject to federal income tax (excluding REITs) and excludes dividends from foreign corporations -- subject to similar restrictions. However, dividends a corporate shareholder deducts pursuant to that deduction are subject indirectly to the federal alternative minimum tax.

In general, your distributions are subject to federal income tax when they are paid, whether you take them in cash or reinvest them in the Fund (if that option is available). Distributions reinvested in additional Shares of the Fund through the means of a dividend reinvestment service, if available, will be taxable to shareholders acquiring the additional Shares to the same extent as if such distributions had been received in cash. Distributions of net long-term capital gains, if any, in excess of net short-term capital losses are taxable as long-term capital gains (at the 15% maximum rate referred to above through the end of 2012), regardless of how long you have held the Shares.

Distributions in excess of the Fund's current and accumulated earnings and profits are treated as a tax-free return of capital to the extent of your basis in the Shares and as capital gain thereafter. A distribution will reduce the Fund's NAV per Share and may be taxable to you as ordinary income or capital gain (as described above) even though, from an investment standpoint, the distribution may constitute a return of capital.

By law, the Fund is required to withhold 28% of your distributions and redemption proceeds if you have not provided the Fund with a correct Social Security number or other taxpayer identification number and in certain other situations.

Taxes on Exchange-Listed Share Sales

Any capital gain or loss realized upon a sale of Shares is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less. The ability to deduct capital losses from sales of Shares may be limited.

Taxes on Purchase and Redemption of Creation Units

An AP who exchanges securities for Creation Units generally will recognize a gain or a loss equal to the difference between the market value of the Creation Units at the time of the exchange and the sum of the exchanger's aggregate basis in the securities surrendered plus any Cash Component it pays. An AP who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of the securities received plus any cash equal to the difference between the NAV of the Shares being redeemed and the value of the securities. The Internal Revenue Service ("Service"), however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales" or for other reasons. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less.

If you purchase or redeem Creation Units, you will be sent a confirmation statement showing how many Shares you purchased or sold and at what price. See "TAXES" in the SAI for a description of the newly effective requirement regarding basis determination methods applicable to Share redemptions and the Fund's obligation to report basis information to the Service.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. Consult your personal tax advisor about the potential tax consequences of an investment in the Shares under all applicable tax laws. See "TAXES" in the SAI for more information.

FUND SERVICE PROVIDERS

Gemini Fund Services, LLC is the Fund's administrator and fund accountant. It has its principal office at 80 Arkay Drive, Hauppauge, New York 11788, and is primarily in the business of providing administrative, fund accounting and transfer agent services to retail and institutional mutual funds. It is an affiliate of the Distributor.

Brown Brothers Harriman & Co., 50 Post Office Square, Boston, MA 02110, is the Fund's transfer agent and custodian.

The Fund has entered into an ETF Distribution Agreement (the "Distribution Agreement") with Northern Lights Distributors, LLC (the "Distributor"), 17605 Wright Street, Omaha, NE 68130, to serve as the distributor for the Fund. Archer Distributors, LLC, an affiliate of the Fund's Investment Advisor ("Archer") is also a party to the Distribution Agreement and provides marketing services to the Fund, including responsibility for all the Fund's marketing and advertising materials. Both the Distributor and Archer are registered broker-dealers and members of the Financial Industry Regulatory Authority, Inc. ("FINRA").

Thompson Hine LLP, 41 South High, Suite 1700, Columbus, Ohio 43215, serves as legal counsel to the Trust.

BBD, LLP, 1835 Market Street, 26th Floor, Philadelphia, PA 19103, serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

Disclaimer

Shares are not sponsored, endorsed, or promoted by the Exchange. The Exchange makes no representation or warranty, express or implied, to the owners of the Shares or any member of the public regarding the ability of the Fund to track the total return performance of their respective Index or the ability of each Index identified herein to track stock market performance. The Exchange is not responsible for, nor has it participated in, the determination of the compilation or the calculation of each Index, nor in the determination of the timing of, prices of, or quantities of the Shares to be issued, nor in the determination or calculation of the equation by which the Shares are redeemable. The Exchange has no obligation or liability to owners of the Shares in connection with the administration, marketing, or trading of the Shares.

The Exchange does not guarantee the accuracy and/or the completeness of each Index or the data included therein. The Exchange makes no warranty, express or implied, as to results to be obtained by the Trust on behalf of the Fund, owners of the Shares, or any other person or entity from the use of each Index or the data included therein. The Exchange makes no express or implied warranties, and hereby expressly disclaims all warranties of merchantability or fitness for a particular purpose with respect to the Index or the data included therein. Without limiting any of the foregoing, in no event shall the Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

OTHER INFORMATION

Investments by Investment Companies

Section 12(d)(1) of the 1940 Act restricts investments by investment companies in the securities of other investment companies, including Shares of the Fund. Registered investment companies are permitted to invest in the Fund beyond the limits set forth in Section 12(d)(1) subject to certain terms and conditions set forth in an SEC exemptive order issued to the Advisor, including that such investment companies enter into an agreement with the Trust on behalf of the Fund.

Continuous Offering

The method by which Creation Units of Shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of Shares are issued and sold by the Fund on an ongoing basis, a "distribution," as such term is used in the Securities Act of 1933, as amended (the "Securities Act"), may occur at any point. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares and sells the Shares directly to customers or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a characterization as an underwriter.

Broker-dealer firms should also note that dealers who are not “underwriters” but are effecting transactions in Shares, whether or not participating in the distribution of Shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker-dealer firms should note that dealers who are not “underwriters” but are participating in a distribution (as contrasted with engaging in ordinary secondary market transactions) and thus dealing with the Shares that are part of an over-allotment within the meaning of Section 4(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the Securities Act is only available with respect to transactions on a national exchange.

Dealers effecting transactions in the Fund’s Shares, whether or not participating in this distribution, are generally required to deliver a Prospectus. This is in addition to any obligation of dealers to deliver a Prospectus when acting as underwriters.

Householding

To reduce expenses, we mail only one copy of the Prospectus or summary prospectus and each annual and semi-annual report to those addresses shared by two or more accounts. If you wish to receive individual copies of these documents, please call the Fund at 1-877-277-6933 between the hours of 8:30 a.m. and 6:00 p.m. Eastern time on days the Fund is open for business or contact your financial institution. We will begin sending you individual copies thirty days after receiving your request.

FINANCIAL HIGHLIGHTS

The financial highlights table is intended to help you understand the Fund's financial performance since its inception. Certain information reflects financial results for a single share. Total return represents the rate you would have earned (or lost) on an investment in the Fund, assuming reinvestment of all dividends and distributions. The information contained in the tables has been audited by BBD, LLP, the Fund's independent registered public accounting firm, whose report, along with the Fund's financial statements, is included in the Fund's annual report, which is available upon request.

Per Share Data and Ratios for a Share of Beneficial Interest Outstanding Throughout Each Period

	Year Ended January 31, 2017	Period Ended January 31, 2016 ⁽¹⁾
Net asset value, beginning of period	\$ 21.50	\$ 25.00
Activity from investment operations:		
Net investment income	0.52	0.30
Net realized and unrealized gain (loss) on investments	2.57	(3.50)
Total from investment operations	3.09	(3.20)
Less distributions from:		
Net investment income	(0.54)	(0.30)
Return of capital	(0.27)	—
Total distributions	(0.81)	(0.30)
Net asset value, end of period	\$ 23.78	\$ 21.50
Total return ⁽⁵⁾⁽⁷⁾	14.52%	(12.90)% ⁽³⁾⁽⁶⁾
Net assets, at end of period (000s)	\$ 3,567	\$ 5,375
Ratio of gross expenses to average net assets	2.02%	2.40% ⁽²⁾
Ratio of net expenses to average net assets	0.65%	0.65% ⁽²⁾
Ratio of net investment income to average net assets	2.31%	1.63% ⁽²⁾
Portfolio Turnover Rate ⁽⁴⁾	114%	62% ⁽³⁾

(1) The Arrow QVM Equity Factor ETF shares commenced operations on February 24, 2015.

(2) Annualized.

(3) Not Annualized.

(4) Portfolio turnover rate excludes portfolio securities received or delivered as a result of processing capital share transactions in Creation Units.

(5) Total return is calculated assuming a purchase of shares at net asset value on the first day and a sale at net asset value on the last day of the period. Distributions are assumed, for the purpose of this calculation, to be reinvested at the ex-dividend date net asset value per share on their respective payment dates.

(6) Represents total return based on net asset values per share from commencement of investment operations on February 24, 2015 through January 31, 2016. Total return based on net asset value per share, as of the close of business on the day of commencement of trading on the NYSE Arca on February 27, 2015 to January 31, 2016 was (12.64)%.

(7) Includes adjustments in accordance with accounting principles generally accepted in the United States and, consequently, the net asset value for financial reporting purposes and the returns based upon those net asset values may differ from the net asset values and returns for shareholder transactions.

Privacy Notice

Rev. November 2011

FACTS WHAT DOES ARROW INVESTMENTS TRUST DO WITH YOUR PERSONAL INFORMATION?

Why? Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.

What? The types of personal information we collect and share depend on the product or service you have with us. This information can include:

- Social Security number
- Assets
- Retirement Assets
- Transaction History
- Checking Account Information
- Purchase History
- Account Balances
- Account Transactions
- Wire Transfer Instructions

When you are *no longer* our customer, we continue to share your information as described in this notice.

How? All financial companies need to share customers' personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers' personal information; the reasons Arrow Investments Trust chooses to share; and whether you can limit this sharing.

Reasons we can share your personal information	Does Arrow Investments Trust share?	Can you limit this sharing?
For our everyday business purposes – such as to process your transactions, maintain your account(s), respond to court orders and legal investigations, or report to credit bureaus	Yes	No
For our marketing purposes – to offer our products and services to you	No	We don't share
For joint marketing with other financial companies	No	We don't share
For our affiliates' everyday business purposes – information about your transactions and experiences	No	We don't share
For our affiliates' everyday business purposes – information about your creditworthiness	No	We don't share
For nonaffiliates to market to you	No	We don't share

Questions? Call 1-877-277-6933

Who we are

Who is providing this notice? Arrow Investments Trust

What we do

How does Arrow Investments Trust protect my personal information? To protect your personal information from unauthorized access and use, we use security measures that comply with federal law. These measures include computer safeguards and secured files and buildings.

Our service providers are held accountable for adhering to strict policies and procedures to prevent any misuse of your nonpublic personal information.

How does Arrow Investments Trust collect my personal information? We collect your personal information, for example, when you

- Open an account
- Provide account information
- Give us your contact information
- Make deposits or withdrawals from your account
- Make a wire transfer
- Tell us where to send the money
- Tells us who receives the money
- Show your government-issued ID
- Show your driver's license

We also collect your personal information from other companies.

Why can't I limit all sharing? Federal law gives you the right to limit only

- Sharing for affiliates' everyday business purposes – information about your creditworthiness
- Affiliates from using your information to market to you
- Sharing for nonaffiliates to market to you

State laws and individual companies may give you additional rights to limit sharing.

Definitions

Affiliates Companies related by common ownership or control. They can be financial and nonfinancial companies.

- *Arrow Investments Trust does not share with our affiliates.*

Nonaffiliates Companies not related by common ownership or control. They can be financial and nonfinancial companies

- *Arrow Investments Trust does not share with nonaffiliates so they can market to you.*

Joint marketing A formal agreement between nonaffiliated financial companies that together market financial products or services to you.

- *Arrow Investments Trust does not jointly market.*
